Product Summary

StockMins-Hoof n Horn*

~ Dry supplement for sheep and cattle ~

Product Code: MHH 17

Purpose:

StockMins-Hoof n Horn is a dual-purpose lambing supplement designed to support ewes during pre and post-lambing when there is an added risk of hoof infection. This supplement helps to fortify hooves, stimulate immune response and aid in hoof repair when animals are predisposed to foot abscess and other *Fusobacterium, Necrophorum* and *Actinomyces* infections. StockMins-Hoof n Horn can be fed to all classes of sheep and cattle that are exhibiting hoof issues.

Product Appearance:

StockMins–Hoof n Horn appears as a granular, palatable, dry and dust controlled powder. It is molasses coated and is weather resistant.

Target Animals:

Feed **StockMins–Hoof n Horn** free-access to sheep and cattle for up to 2 months prior to times of exposure and wet pastures. For general hoof improvement, feed continuously at the recommended rates

Product Features:

- Contains biotin which has been shown to increase hoof quality and strength.
- As well as inorganic zinc, **StockMins–Hoof n Horn** contains a high level of ZinMet®, an organic, highly available form of zinc bound to the amino acid methionine. ZinMet® has strong indications for hoof quality and immune response.
- Contains high levels of iodine as indicated for foot abscess in sheep.
- Vitamin E for ewe health, immune-response and lamb survival and viability.
- Is fortified with Acid Buff® to reduce the chance of acidosis.

Feeding Instructions:

Mixed Rations:- Mix thoroughly together with other ingredients to make a complete mixed ration at a rate of 25kg of **StockMins–Hoof n Horn** supplement per 1 tonne of feed.

Free Access Feeding:- Offer **StockMins–Hoof n Horn** free access in tubs limiting intake to around 20 - 30g/head/day for sheep and 100 – 150g/head/day for cattle once animals are fully adapted. Use one tub for 50 – 60 sheep or 30 cattle.

***** Supplied with or without Bovatec®

Caution:

- **<u>Only feed to livestock intended.</u>**
