

Product Summary

StockGro – HiMag*

~ Liquid Feed Supplement for Cattle ~

Product Code: GM 03

Purpose:

To assist in the control of Grass Tetany and other magnesium related deficiencies in cattle by direct feeding free access or inclusion in complete feed at pasture.

Product Appearance:

StockGro-HiMag appears as a dark creamy brown viscous liquid with a consistency of single cream. To the human palate it has a bitter but sweet flavour with clear molasses characteristics.

Target Animals:

Offer **StockGro-HiMag** to cows with calves to coincide with predisposing conditions of grass tetany. **StockGro-HiMag** is strongly indicated for lactating cattle from autumn through to spring when pasture is flush and lacking in structure together with external stresses such as wet and cold conditions or excessive movement. Also, offer **StockGro-HiMag** to cattle of all ages when grazing crops that are high in potassium and low in calcium, phosphorus and magnesium.

Product Features:

- Contains high levels of magnesium from 4 sources to meet the demands of pregnant, lactating or growing animals and aid in the prevention of grass tetany.
- Magnesium sources have different solubilities and release rates thereby providing a broader cover of magnesium uptake.
- Contains acid (anionic) salts to assist in skeletal mineral mobilisation (calcium, phosphorous and magnesium) to support lactation.
- Contains optimum levels of essential minerals and trace elements necessary for optimum health of lactating cattle and growth and performance of growers at pasture and cereal crop.

* Can be supplied with the addition of Bovatec® for increased feed efficiency, help support lactation and control of Coccidiosis in calves.

Cost:

StockGro-HiMag costs, depending on the size and class of animal and the correlating recommended consumption rate (see table below), is between 7 & 22cents per head per day.

Feeding Instructions:

Feed **StockGro-HiMag** directly in polypropylene tubs in the paddock as a free access supplement. Use one tub 500l tub per 40 – 50 animals. It may also be mixed with a feed supplement or TMR.
