Product Summary

StockGro – HiPro

~ Liquid Feed Supplement for Cattle ~

Product Code: GH 01

Purpose:

To be fed as a supplement with dry feed and roughages to elevate fibre digestibility and the efficient utilisation of farm-produced forages. **StockGro-HiPro** delivers a direct and effective source of minerals, vitamins and essential trace elements to the rumen and the animal.

Product Appearance:

StockGro-HiPro appears as a dark brown viscous liquid with a consistency similar to that of single cream. Its taste to the human palate is salty and slightly sour but also sweet and treacly.

Target Animals:

Feed **StockGro-HiPro** to dry and lactating cows, growing weaners, moderate performing steers, bullocks and bulls on high roughage and dry pasture diets where protein supply is marginal.

Product Features:

- Provides 3 forms of rumen degradable protein including urea (8.0%), equating to 27% crude protein.
- Contains a blend of sulphur, calcium and other essential minerals and trace elements to stimulate efficient rumen function.
- High levels of vitamins to promote optimum health and compensate for the low concentration of vitamins in roughages and stubble.
- High level of vitamin E for improved immune response, meat quality and viability of calves and weaners.
- Contains acidic salts to moderate blood pH and aid in mineral mobilization.
- Added copper to combat against antagonists such as sulphur and molybdenum and to aid in the prevention of copper deficiency.

** Bovatec® can be added for its promotion of certain beneficial rumen bacteria and assist in the control of coccidiosis in calves. This can result in enhanced rumen metabolism and a healthier gastro-intestinal tract that leads to better growth, feed efficiency and higher milk production.

Expected Performance:

Trials have shown that **StockGro-HiPro** can achieve up to 0.5kg LWG/day in steers on stubble, 0.6kg LWG per day in dry cows on stubble and will support maintenance and calf growth in lactating cows on stubble with a supplement of moderate quality hay or silage.

Cost:

StockGro-HiPro costs, depending on the size and class of animal and the correlating recommended consumption rate (see table below), is between 10 & 65cents per head per day.

Feeding Instructions:

Offer **StockGro-HiPro** free access in polypropylene tubs or mixed in feed.

Use one tub for 40 – 60 animals. **ANP** can provide tubs on a returnable on loan basis.

It is advisable to place tubs of **StockGro-HiPro** in positions in the paddock that are well away from or diametrically opposite to the water source. Roughage in the paddock must be available and plentiful.

Caution:

- * **Feed only to intended livestock!**
- * **Do not allow access to horses!**
- * **This is a specialty product. Do not feed to hungry or dehydrated livestock. Excessive consumption can be fatal.**

Recommended Intakes for Bovine Livestock:

Animal	Live Wt Range (kg)	Target Daily Intake (ml)
Cows/Calves	450 – 700	400 – 600
Dry Cows	400 – 500	350 – 450
Weaners	160 – 230	100 – 250
Yearlings	300 – 400	300 – 400
Steers/Heifers	400 – 500	300 – 500
Bullocks/Bulls	550 – 700	500 – 700

Other Products in the StockGro Range:

StockGro-EziWean: a high magnesium supplement designed to **calm calves during weaning** by reducing dehydration, hyperactivity and excessive weight loss.

- Protein (3%), ME 10.8MJ/kg DM, lasalocid (150mg/kg), including vitamins A, D₃, E & B₁, minerals and trace elements.

StockGro-HiMag: a high magnesium cattle supplement designed to assist in the control of **grass tetany** and magnesium deficiency issues.

- Salt (12%) Magnesium (3.5%), calcium (0.5%), phosphorus (0.7%).

StockGro-Bloat Control 50+Bovatec®: a **bloat suppressing supplement** for cattle on low to medium risk pasture including Bovatec® for added protection, weight gain and microbial manipulation in the rumen.

- Salt (12%), teric (5%), magnesium (0.9%), lasalocid (600mg/kg)

StockGro-Feedlot 40 + Bovatec®: a **high protein complete cattle supplement** designed to complete a TMR for growers in a feedlot environment.

- Protein (32%), lasalocid (600mg/kg), urea (9.5%), vitamin E (500mg/kg)

StockGro-StopStress: a cattle supplement to be fed **pre- and post-transportation to reduce stress** related issues. Also assists ease of calving.

- Protein (3%), ME 12.7MJ/kg DM, including potassium, sodium, magnesium, vitamin E and glucose precursors.

StockMins-HiPro: a high protein complete sheep and cattle supplement designed to accompany dry feeds and roughages to **increase fibre digestibility**, available energy and utilisation of on farm forages.

- Protein (27%), phosphorous (2.1%), sulphur (1.2%), magnesium (2.1%), vitamin E (750mg/kg)

StockMins-Beef Feedlot 40 + Bovatec®: a complete supplement designed to accompany and balance **high grain diets** for growing and **fattening cattle**.

- Protein (28%), calcium (20%), organic zinc (0.5%), vitamin E (500mg/kg), lasalocid (1000mg/kg), acid salts, high level buffers.
