"Livestock Nutrition Solutions"

Product Summary

StockMins-EweLamLac HE

~ Dry supplement for sheep ~

Product Code: ME22

Purpose:

A complete high specification supplement designed to be fed pre- and post-lambing at times when nutritional needs for major minerals, essential trace elements and vitamins are at their peak. Cracked corn has been purposely added as a source of energy that supplies a valuable glucose precursor. Energy supplied in this form, can help aid in the prevention of twin lamb disease (ketosis) and can aid in increasing milk production. It can be fed free access or included in mixed rations. Bovatec® can be added for improved lactation and growth and the control of coccidiosis in lambs.

Product Appearance:

StockMins-EweLamLac HE appears as a granular, palatable and dust controlled powder with visible flecks of cracked maize corn. It is molasses coated and weather resistant.

Target Animals:

Feed free-access (25 - 35grams per head per day) to ewes from six weeks to a month prior to lambing and continue feeding to ewes and lambs for at least six weeks post lambing. **StockMins-EweLamLac HE** can also be used two weeks prior to and at joining to boost ovulation in ewes and fertility in rams. It may be included in a mixed ration if desired.

Product Description:

StockMins-EweLamLac HE is:

- Contains high levels of available magnesium (5.2%) from four sources to match the sites of absorption and to meet the animal's higher demand during pregnancy and lactation.
- Supplies high levels of calcium (13%) and phosphorus (3.5%) for foetal development and lactation.
- Contains elevated levels of vitamins (A, D₃ and E), minerals and essential trace elements necessary for optimum growth and performance at pasture in times of high nutritional demand.
- Contains levels of vitamin E well above RDI for ewe health, immune-response and lamb viability.
- Supplies 3-5gms of cracked corn to boost energy as a glucose precursor.
- Contains a high level of sulphur (1.2%) to aid in the reduction of wool break and stimulate fleece growth.
- Contains acidic salts to help moderate blood pH and aid in mineral mobilization.
- Molassed and granular to improve palatability, control dust and product losses and limit segregation.
- Weather resistant to reduce water damage and leaching.

*Can be supplied with the addition of Bovatec® for increased growth, feed efficiency, higher milk production and the control of Coccidiosis in lambs.

Cost: **StockMins-EweLamLac HE** costs 6cents/hd/day at recommended intakes.

Feeding Instructions:

Mixed Rations: - Mix 25- 40kg of **StockMins-EweLamLac HE** per tonne of feed.

Free Access Feeding: - Offer free access in tubs limiting intake to around 30g/head/day once animals are fully adapted. Animals will control their own intake.

Use one tub for 50 – 60 sheep, replenishing supplement as necessary.

Caution: Only feed to livestock intended.

Other Products in the StockMins range:

StockMins-EweLamLac: a nutritional supplement designed to help **reduce pregnancy toxemia** and stress related disease during lambing. For ewes and lambs 6 weeks pre- and post-lambing. It focuses on magnesium, calcium and phosphorus deficiencies as well as vitamin E for immune response.

- Magnesium (5.5%), phosphorous (4.8%), calcium (18%) and vitamin E (800mg/kg).

StockMins-HiMag: a high magnesium complete sheep and cattle supplement, designed to enhance metabolism and prevent the onset of magnesium deficiency symptoms such as grass tetany.

- Magnesium (6%), phosphorous (2%), acidic salts, salt and buffers.

StockMins-Lamb Grower: a high protein supplement designed to accompany and balance **high grain feedlot diets** for growing and fattening lambs and sheep.

- Protein (25%), phosphorus 2.1%, vitamin E (750mg/kg), urea (6.5%), lasalocid (1200mg/kg), acid salts and buffers.

StockMins-Lamb Finisher: a complete supplement designed to **enhance the growth of rapidly growing lambs** on fresh pasture and lucerne including buffers to supplement some grain feeding.

- Protein (12%), phosphorous (2.2%), lasalocid (1000mg/kg) and buffers.

StockMins-Hoof n Horn: for the improvement of **hoof health and prevention of foot abscess** and other foot related diseases (Laminitis) in sheep and cattle.

- High levels of organic and inorganic zinc, biotin, calcium, vitamins A, D₃ and B₁, buffers, iodine and vitamin E at therapeutic levels.

StockMins-Detox: contains toxin binders that help **reduce the effect of toxins from noxious weeds**, such as hairy panic and caltrop in cattle and sheep.

- Elevated levels of zinc oxide, Mastersorb® and vitamin E. Also contains phosphorous, calcium trace elements and vitamin A and D₃.
