Product Summary

StockMins – Lamb Feedlot

~ Dry supplement for feedlot lambs and sheep ~

Product Code: MLF07

Purpose:

A complete supplement designed to accompany and balance high grain feedlot diets for growing and fattening lambs or sheep.

Product Appearance:

StockMins-Lamb Feedlot appears as a semi-granular, slightly moist, dust-controlled premix. It contains coarse granules interspersed in a powdered matrix. It is light brown in colour with a distinct smell of ammonia.

Product Features

- Is fortified with short, mid and long-term acting buffers to help stabilize rumen pH and reduce the incidence of sub-clinical and clinical acidosis.
- Contains optimum balanced levels of essential vitamins, minerals and trace elements for peak animal performance, adapted for the special needs of feedlot lambs.
- Contains Bovatec® for improved feed conversion efficiency, general gut health and the control of coccidiosis in lambs.
- Contains acid salts to acidify urine pH to reduce the incidence of urinary calculi in wethers.
- Supplies elevated levels of vitamin E to influence immune response, meat quality, and tissue growth and repair.
- Thiamine (vitamin B1) is added to help control Polioencephalomalacia (PEM) and other thiamine-related deficiencies that can be seen when feeding high grain diets.
- Partly weather resistant to reduce rain damage and leaching.
- Partly granular to reduce segregation.
- Molassed to control dust and product losses and limit separation in mixed grain feeds.

Cost:

At recommended use rates, 4.4-5 cents per head per day or ~ \$47.00-\$63.00 per tonne of finished feed depending on inclusion.

Feeding Instructions:

Mix thoroughly together with other ingredients to make a complete mixed ration at a rate of 25 - 35kg of **Lamb Feedlot** supplement per 1 tonne of feed. The inclusion rate of finished feed should deliver 30 grams per head per day of **Lamb Feedlot** supplement.

Alternatively, offer free access in tubs limiting intake to around 20g-30g/head/day once animals are fully adapted. Animals will tend to control intake to recommended levels once adapted. When feeding free access use one tub for 50-60 lambs.

Caution: **Do not allow access to horses!**
 Only feed to livestock intended.
