in cattle and sheep**

This Product does not contain Restricted Animal Material

MUST MIX PRODUCT PRIOR TO USE!

20 Litres

Bloat Liquid 250

TERIC PE62

Batch:

Exp:

DIRECTIONS FOR USE

1. In Drinking Troughs

Cattle suffering from bloat or at risk should each consume 40ml of ANP Bloat Liquid 250 per day for the desired effect. For best results, 40ml of Bloat Liquid 250 should be added per 15L of trough water. Animals should not have access to other sources of water.

2. Feed troughs in dairy

Bloat Liquid 250 may be mixed with molasses (1:2) and mixed with feed in troughs at a rate of 100ml per animal twice daily during milking.

For further information contact ANP
info@ausfarmnutrition.com or contact your local ANP
Bloat Liquid 250 supplier.

WITHHOLDING PERIOD - NIL

Only feed to intended animals.

FIRST AID

If poisoning occurs, contact a doctor or Poisons
Information Centre (Phone 131126)

MIX WELL BEFORE USE

Additional information available on Material Safety Data Sheet.

DISPOSAL

Triple or pressure rinse containers. Dispose of rinse water in appropriate chemical disposal locations clear of waterways and vegetation.

STORAGE

Store below 30°C (Room temperature) in original container, tightly closed and in a safe place.
Keep out of reach of children

SAFE HANDLING

Handle in accordance with safe industry practice.
Additional information available on SDS.
