Product Summary

StockMins – CLS

~ Dry supplement for sheep and cattle ~

Product Code: MCM29

Purpose: **StockMins-CLS** is an economic and convenient take on the traditional Causmag, Lime and Salt mix. It is a high magnesium, high calcium, water resistant and dust-controlled supplement designed to be fed to sheep or cattle when magnesium deficiency is expected or detected. It is not as effective as **StockMins–HiMag** or **StockMins-EweLamLac**, but is a low-cost alternative.

Product Appearance:

StockMins–CLS is a light coffee coloured semi-granular, dry feed supplement. It is coated with molasses and oil and has a sweet molasses aroma.

Product Features:

- Molassed, oiled and granular to control dust, reduce product losses and limit segregation in mixed feeds.
- Weatherproof to reduce rain damage and leaching.
- Contains high levels of salt and calcium to assist in magnesium absorption.
- Contains minimum 15% magnesium primarily in the form of magnesium oxide and magnesium carbonate to assist the animals' high demands of late pregnancy and lactation.
- Acid buffers are present to help control extremes of rumen pH on fresh pasture.
- Contains bentonite to stabilise rumen conditions.

Cost:

StockMins–CLS costs approximately 3.7 cents for sheep and 10 cents for cattle per head per day at recommended intakes.

Feeding Instructions:

Mixed Rations:- Mix 25-50kg per tonne of air dried feed ingredients in a TMR.

Free Access Feeding:- Offer **StockMins – CLS** free access in tubs allowing intake to 20-30g/head/day for sheep and 100-150g/head/day for cattle. Use one tub for 50-60 sheep or 20-30 cows.

** For best results in Sheep, **StockMins-HiMag** or **StockMins-EweLamLac** is recommended*

** For best results in Cattle, **StockGro-HiMag** liquid feed supplement is recommended.*

Caution: Feed only to livestock intended.
