

StockMins-DeTox

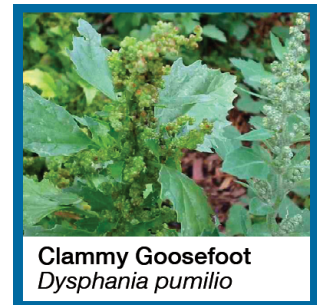

Toxin Deactivating Supplement for Sheep

Protect livestock
against a variety of
harmful forage toxins

Assist with immunity,
tissue recovery &
repair

Stimulate and support
enhanced liver function
& gut integrity

Don't get stung grazing toxic weeds this summer

Supplement with StockMins-DeTox to help protect your sheep from toxic insult

StockMins-DeTox is a uniquely formulated, high specification, weatherproof, loose-lick supplement designed to reduce the effects of a broad spectrum of forage toxins in sheep. StockMins-DeTox works through two broad modes of action when it comes to toxic insult, DEFEND and DEACTIVATE

DEFEND

Through the supply of effective levels of organic and inorganic essential minerals, vitamins and trace elements StockMins-DeTox boosts the animal's immunity, gut integrity, energy metabolism and tissue regeneration.

DEACTIVATE

The inclusion of a combination of broad-spectrum toxin deactivators, antioxidants and specially designed ingredients work to deactivate toxins and mop up free radicals during a toxic challenge.

Product Summary

StockMins-Detox

~ Toxin Deactivating Supplement for Sheep ~

Product Code: MDT18

Purpose:

StockMins-Detox is a high specification, weatherproof, loose-lick supplement designed to reduce the effects of a broad spectrum of forage toxins in sheep.

Anecdotal evidence from producers over a 10 year period has suggested that StockMins-Detox has an impact on the control of symptoms of toxicosis in livestock grazing common toxic summer weeds including Hairy Panic, Heliotrope, Goosefoot, and Caltrop.

Product Features:

StockMins-Detox contains:

- Proven and effective broad-spectrum toxin deactivators that have been shown to reduce the impact of ergot alkaloid driven toxicosis conditions in grazing, including toxicosis from perennial ryegrass, fescue, paspalum and sorghum. These toxin deactivators have also been shown to reduce the impacts of mycotoxins and endotoxins created by rumen insults.
- Effective levels of essential minerals (Na, S, Mg, P & Ca), vitamins (A, D3, E and C) and trace elements (Se, I, Co, Mn, Mo & Zn) to help boost immunity, skin and gut integrity while elevating energy metabolism and tissue recovery
- Molybdenum can reduce the copper load on the liver when liver function has been compromised by alkaloids dispensed from toxic weeds
- Selenium and Vitamin E that are strong antioxidants and have a key role in cleaning up free radicals following a toxic challenge to prevent damage to cells
- Vitamin E and Vitamin C that have important roles in expediting healthy tissue repair, enabling the animal to recover quicker from a toxic insult
- Bentonite, a clay that is known to assist in absorbing toxins
- Weatherproof, safe and easy to use

Cost:

StockMins-Detox costs approximately a 7.5 to 8.5 cents/hd/day based on a recommended average daily consumption of 25g/hd/day.

Feeding Instructions:

Livestock offered StockMins-Detox should also be fed palatable hay or straw to reduce the amount of toxic weeds consumed and assist in diluting ingested toxins.

Free Access Feeding: Offer **StockMins-Detox** free access in tubs allowing 1 tub per 50 to 60 sheep. Animals will regulate their own intake to between 20 to 30g/hd/day.

Mixed Rations: Mix 25kg (1 bag) per tonne of air dried feed ingredients in a TMR.

Caution:

*** Feed only to livestock intended.**

*** Ensure stock have adequate access to feed and water to avoid excessive weed consumption.**

StockMins-Detox is formulated and manufactured by AusFarm Nutrition Products 0412 048 055.
