Production

**\$21**

Greater Value  
Per Ewe

## SUPPORTING HEALTHY EWES TO MAXIMISE LAMBING PERFORMANCE

### StockMins-EweLamLac

StockMins-EweLamLac is a weatherproof, granular loose-lick supplement specifically designed to support pregnant and recently lambing ewes when essential minerals, vitamins and trace elements are in high demand.

### StockMins-EweLamLac HE vs Causmag, lime & salt

A recent independent study<sup>1</sup> involving 425 single bearing ewes concluded that offering StockMins-EweLamLac HE (a version of StockMins-EweLamLac), throughout the lambing period, increased weaning percentage and average lamb weaning weight when compared to a supplement of equal parts Causmag, lime and salt offered during the same period.

### What does this mean for the bottom line?

These results saw 30% more lamb produced at weaning and, at the current market value (feeder lamb price 325c/kg lwt), \$21 greater revenue generated per ewe.

### **Product Summary**

## **StockMins-EweLamLac**

~ Lambing Supplement ~

**Product Code: ME02**

#### **Purpose:**

**StockMins-EweLamLac** is a complete high specification weatherproof, granular supplement designed to be fed pre and post-lambing when requirements for essential minerals, vitamins and trace elements are at their peak. Providing pregnant and lactating ewes with this effective blend of macro and micro minerals can reduce the incidence of perinatal mortality and improve lamb and ewe immunity.

#### **Product Appearance:**

**StockMins-EweLamLac** is a light coffee coloured, semi granular, dry feed supplement. It is coated with molasses and oil and has a sweet molasses aroma.

#### **Product Features:**

**StockMins-EweLamLac** contains the following features:

- High levels of highly available magnesium (5.2%) from multiple sources to quickly and effectively match the sites of absorption and to meet the animal's elevated demand during pregnancy and lactation.
- High levels of calcium (13%) and phosphorus (3.5%) for foetal development and lactation.
- Elevated levels of vitamins (A, D3 and E), minerals and essential trace elements necessary for optimum growth and performance at pasture in times of high nutritional demand.
- Vitamin E well above RDI for ewe health, immune-response and lamb viability.
- A high level of sulphur (1.2%) to aid in the reduction of wool break and stimulate fleece growth.
- Acidic salts to help moderate blood pH and aid in mineral mobilisation.
- Molassed, oiled and granular to control dust and product losses, limit segregation in mixed feeds and reduce separation.
- Weather resistant to reduce rain damage and leaching

#### **Cost:**

**StockMins-EweLamLac** costs approximately a 6.5 cents/hd/day at recommended intakes.

#### **Feeding Instructions:**

**Free Access Feeding:** Offer **StockMins-EweLamLac** free access in tubs limiting intake to 20-30g/head/day. Once fully adapted (after 5 to 7 days), fill tubs up as ewes will control their own intake. Use one tub for 50-60 ewes.

**Mixed Rations:** Mix 25 to 50kg of **StockMins-EweLamLac** per tonne of feed (allowing an intake of no less than 20g/hd/day of **StockMins-EweLamLac**).

#### **Caution:**

- \* **Feed only to livestock intended.**
- \* **Ensure stock have adequate access to feed and water to avoid excessive consumption.**
