SUPPORTING HEALTHY EWES TO MAXIMISE LAMBING PERFORMANCE

StockMins-EweLamLac

StockMins-EweLamLac is a weatherproof, granular loose-lick supplement specifically designed to support pregnant and recently lambing ewes when essential minerals, vitamins and trace elements are in high demand.

StockMins-EweLamLac HE vs Causmag, lime & salt

A recent independent study¹ involving 425 single bearing ewes concluded that offering StockMins-EweLamLac HE (a version of StockMins-EweLamLac), throughout the lambing period, increased weaning percentage and average lamb weaning weight when compared to a supplement of equal parts Causmag, lime and salt offered during the same period.

What does this mean for the bottom line?

These results saw 30% more lamb produced at weaning and, at the current market value (feeder lamb price 325c/kg lwt), \$21 greater revenue generated per ewe.

StockMins-EweLamLac

Granular Lambing Supplement for Sheep

Product Code: ME02

StockMins-EweLamLac is a high-specification, weatherproof, granular, loose-lick supplement designed to support pregnant and lactating ewes at a time when essential minerals, vitamins and trace elements are in high demand. For best results, **StockMins-EweLamLac** should be fed from 4 weeks pre-lambing until 4 weeks post-lambing.

Product Description

StockMins-EweLamLac contains high levels of available magnesium, calcium and acidic salts, as well as elevated levels of other essential minerals, vitamins and trace elements. This specific blend is designed to boost ewe health and immune response, and in doing so, assist in reducing the occurrence of common metabolic diseases associated with pregnant and lactating ewes, including pregtox, dystocia and hypocalcaemia.

*Despite magnesium accounting for 6% of the supplement. Magnesium in StockMins-EweLamLac is provided from multiple sources with varying solubility to match the sites of absorption and maximise overall bioavailability of magnesium to the animal.

Product Appearance

StockMins-EweLamLac is a mid to dark brown, dust controlled, sand-like feed supplement with a dispersion of white flecks throughout. It is coated with molasses and oil with a sweet molasses smell.

Feeding Instructions

Offer free-access allowing ewes to consume an average of 20 to 30g/hd/day. Once animals are fully adapted animals will control their own intake. Use one tub (20L drum cut in half) for 50 sheep and replenish supplement as necessary.

Caution

- Only feed to intended livestock
- Do not allow access to horses
