Satisfy Mineral &
Trace Element
Deficiencies

Achieve Rapid
Growth on
Green Feed¹

Weatherproof,
Safe & Easy to
Use

High Specification, Loose-Lick Feedlot Supplement

StockMins-Lamb Feedlot

StockMins-Lamb Feedlot is a complete feedlot supplement containing high concentrations of essential minerals, vitamins, trace elements and buffers. It is designed to accompany and balance high grain diets for rapidly growing lambs.

Controlled Consumption for Optimum Efficacy

StockMins-Lamb Feedlot has been specifically formulated with a balance of salt, buffers and flavours to attract lambs and control consumption. StockMins-Lamb Feedlot is designed to be fed at a rate of 25 to 50g/hd/day (free access) for lambs weighing 30 to 60kg. StockMins-Lamb Feedlot can also be added to a total ration at a rate of 25kg/tonne of mixed feed.

Weatherproof, Easy to Use and Economic

StockMins-Lamb Feedlot is fortified with weatherproofing ingredients to support tear and tip free-access feeding. At a consumption rate equivalent to 25kg/tonne of feed (2.5%), StockMins-Lamb Feedlot is included at half the rate of most mineral concentrate feedlot pellets.

Product Summary

StockMins-Lamb Feedlot

~ Feedlot Supplement for Rapidly Growing Lambs ~

Product Code: MLF07

Purpose:

StockMins-Lamb Feedlot is an economic and convenient complete supplement designed to accompany and balance high grain feedlot diets for growing and fattening lambs or sheep.

Product Appearance:

StockMins-Lamb Feedlot is a semi-granular, dust-controlled premix. It contains coarse granules interspersed in a powdered matrix. It is light brown in colour with a distinct smell of ammonia.

Product Features:

StockMins-Lamb Feedlot is a high specification palatable supplement that is designed to be offered free-access in the pens or added to the grain mix.

- Is fortified with short, mid and long-acting buffers to help stabilise rumen pH and reduce the incidence of sub-clinical and clinical acidosis.
- Provides balanced levels of essential minerals, vitamins and trace elements for peak animal performance, adapted for the special needs of feedlot lambs.
- Contains Bovatec® for improved feed conversion efficiency, general gut health and the control of coccidiosis in lambs.
- Contains calcium to balance high levels of phosphorous in grain and acid salts to acidify urine pH to reduce the incidence of urinary calculi in wethers.
- Supplies elevated levels of vitamin E to influence immune response, meat quality, and tissue growth and repair.
- Thiamine (vitamin B1) is added to help control Polioencephalomalacia (PEM) and other thiamine-related deficiencies that can be seen when feeding high grain diets.
- Mid-level weatherproofing to reduce rain damage and leaching.
- Partly granular to reduce segregation.

Cost:

StockMins-Lamb Feedlot costs approximately a 6 to 12 cents/hd/day in line with the amount of grain consumed by the animals.

Feeding Instructions:

Free Access Feeding: Offer **StockMins-Lamb Feedlot** free access in tubs allowing 1 tub per 50 to 60 sheep. Animals will regulate their own intake in line with the amount of grain offered. On a high concentrate diet consumption should average 1g/kg lwt/day.

Mixed Rations: Mix 25kg (1 bag) per tonne of air dried feed ingredients in a TMR.

Caution:

*** Feed only to livestock intended.**

*** Ensure stock have adequate access to feed and water to avoid excessive consumption.**
