# StockMins-BoviBloat

## Green Feed Supplement for Cattle

Designed to aid in the reduction of bloat in cattle on pasture

Powerful surfactant with strong anti-foaming properties

Ionophore free, safe & easy to use

## Support Growing Cattle on Lush Green Feed

### StockMins-BoviBloat

StockMins-BoviBloat is an ionophore free loose lick supplement designed to assist in the control and onset of frothy bloat symptoms in cattle grazing green feed.

### Controlled Consumption for Optimum Efficacy

StockMins-BoviBloat has been specifically formulated for cattle under bloat conditions to consume an average of 100g to 150g/hd/day to achieve desired dose and effect. Consumption may vary depending on pasture quality, quantity and bloat challenge.

At the average targeted consumption rate of 100g, one bag of StockMins-BoviBloat should supplement 250 cows per day.

### Minerals and Trace Elements

StockMins-BoviBloat is fortified with essential minerals and trace elements to assist in correcting common deficiencies associated with livestock grazing green feed.

### Partially Weatherproof

Although StockMins-BoviBloat is partially weatherproof, it is advised to avoid water affecting the supplement as consumption of wet product may be reduced.

### **Product Summary**

#### **StockMins-BoviBloat**

~ Green feed supplement for cattle ~

**Product Code: MVB1**

**Purpose:**

**StockMins-BoviBloat** is designed to assist in the control and onset of symptoms of pasture bloat by direct feeding at pasture or including in feed rations.

**Product Appearance:**

**StockMins-BoviBloat** is an ionophore free, palatable, molassed, semi-granular feed supplement. It appears as a light coffee colour. It is salty to the taste with a distinct sweet smell and bitter after taste.

**Product Features:**

**StockMins-BoviBloat** contains the effective surfactant Teric PE62 to aid in the control and onset of pasture bloat caused by direct feeding at pasture.

Key features include:

- Strong anti-foaming properties of Teric, even at small levels of intake.
- Fortified with calcium, salt, magnesium and essential trace elements to assist in correcting common deficiencies associated with growing livestock grazing lush green pasture.
- Partially weatherproof to reduce rain damage and leaching. Although avoiding water is recommended.

**Cost:**

**StockMins-BoviBloat** costs approximately a 20 to 40 cents/hd/day at recommended intakes.

**Feeding Instructions:**

**Free Access Feeding:-** Offer **StockMins-BoviBloat** free access in tubs limiting intake to 100-150g/head/day. Use one tub for 20 to 30 cattle.

**Mixed Rations:** Mix at a rate that enables a daily dose of at least 100g/hd/day of **StockMins-BoviBloat**.

**StockMins-BoviBloat** is partially weatherproof. It is advisable to prevent rain from affecting the product where possible. Where rainwater is unavoidable, use tubs (half 200L drums or half 20L drums are ideal) with slits down the side and a few holes in the bottom to let rainwater drain out. **Consumption may be reduced if product is wet.**

**Caution:**

- **DO NOT RELY ON THIS PRODUCT ALONE FOR COMPLETE BLOAT CONTROL. StockMins-BoviBloat should be used as part of an integrated management system including regular monitoring.**
- **Feed only to livestock intended.**
- **Do not allow access to horses.**
- **Do not feed to sheep.**
- **Introduce gradually and monitor intakes until intake stability is achieved.**
