FlyBye Premix

Product Code: MFP60

Purpose:

FlyBye Premix is a specially formulated mix of natural ingredients, including garlic, that is designed to aid in reducing fly pressure in cattle at times of high challenge.

Active Ingredients: Sulphur 50%, Garlic Oil 11%
Contains: Calcium & Fibre

Product Features:

- Has been shown to reduce fly pressure in cattle under differing levels of pressure and environments[1,2]
- Is readily dispersible in feed mixes for even distribution throughout the mix
- At the recommended dose rate, research has revealed that key actives within FlyBye Premix have no impact on milk and cheese flavour and smell[3]

Cost:

FlyBye Premix costs approximately 6 cents/hd/day at the recommended intake level of 10g/hd/day.

Directions for use:

Mixed Rations: Mix thoroughly with other feed ingredients, allowing a dose of 10g of FlyBye Premix per head per day.
Pellets: Mix thoroughly with minerals and other additives in a pellet, allowing a dose of 10g of FlyBye Premix per head per day.

Intended Livestock:
Only feed to beef or dairy cattle

Storage Conditions:
Store in a cool, dry place. Protect from light. Keep partially used bags tightly sealed after use.

Safe Handling:
Handle in accordance with safe industry practice. Additional information is available on the SDS.

Net Weight:25kg

This product does not contain Restricted Animal Material

Caution:

- **Feed only to livestock intended.**
- **Read label instructions before use.**
