

Product Summary

FlyBye Premix

~ Fly Controlling Premix for Cattle ~

Product Code: MFP60

Purpose:

FlyBye Premix is specially formulated mix of natural ingredients that, when in combination, is designed to reduce fly pressure in dairy and beef cattle.

Product Appearance:

FlyBye Premix is a ground cereal fibre based premix with a strong garlic smell. It appears as a light brown meal.

Product Features:

- Has been shown to reduce fly cover and defensive behaviour from cattle under differing levels of fly pressure
- Is readily dispersible in feed mixes for even distribution of active ingredients
- At the recommended dose rate, research has revealed that key actives within FlyBye Premix have no impact on milk and cheese flavour and smell

Cost:

FlyBye Premix costs approximately a 5 to 10 cents/hd/day in line with the amount of concentrated feed consumed

Feeding Instructions:

Mixed Rations: Mix thoroughly with other feed ingredients allowing a dose of 10g of FlyBye Premix per head per day.

Pellets: Mix thoroughly with minerals and other additives in a pellet, allowing in the final ration a dose of 10g of FlyBye Premix per head per day.

Caution:

- **Feed only to livestock intended.**
- **Read label instructions before use.**
