Product Summary

BoviPro-FlyBye

~ Supplement for Cattle Grazing Dry Feed ~

Product Code: MBPF32

Purpose:

BovPro-FlyBye is a specially formulated granular supplement that is designed to aid in the reduction of fly pressure on cattle and increase the digestibility and efficient utilisation of dry feed. BoviPro-FlyBye delivers direct and effective sources of protein, minerals, vitamins and essential trace elements to the rumen and the animal, and is ideal to assist in providing maintenance for cattle on dry feed.

Product Features:

- Garlic has been shown to reduce fly cover on cattle under differing levels of fly pressure.¹
- 35% crude protein, consisting of both rumen degradable protein, including urea (8%), and true protein.
- Effective starch to stimulate greater rumen microbial activity, increase nitrogen utilisation and improves fibre digestion.
- Balanced levels of available calcium (11%), phosphorus (2%), magnesium (1%) and salt (15%) for optimum performance on dry feed and stubbles.
- Essential trace elements (I, Se, Cu, Mo, Zn & Co) and vitamins A, D & E to help promote optimum health, wellbeing and support fertility.
- Sulphur at elevated levels to balance urea and stimulate rumen function and boost feed use efficiency.²
- Flavoured, oiled and granular to increase palatability, control dust, reduce product losses and limit segregation in mixed feeds.
- Weather resistant to reduce water damage and leaching.

Cost:

BoviPro-FlyBye costs approximately a 50 to 60 cents/hd/day at recommended intakes.

Feeding Instructions:

Free Access Feeding: Offer **BoviPro-FlyBye** free access in tubs limiting intake to 250 to 300g/head/day. Use one tub (e.g. 200L drum cut in half from top to bottom) for 20 to 30 cattle. Ensure tubs have adequate drainage (slits down the sides) to avoid product sitting in water.

BoviPro-FlyBye is partially weatherproof. It is advisable to prevent rain from affecting the product where possible. Where rainwater is unavoidable, use tubs with slits down the side and a few holes in the bottom to let rainwater drain out. **Consumption may be reduced if product is wet.**

Caution:

- **BoviPro-FlyBye contains 8% urea. Introduce gradually by mixing 50/50 with lime for around 5 days.**
- **Do not feed to hungry livestock.**
- **Feed only to livestock intended. Do not allow access to horses.**
- **Excessive intake can cause toxicity. Introduce gradually and monitor intakes until intake stability is achieved.**
